

Cool Bees

Jan. 14: Bugs

Kadie Britt, E&H Class of 2013, entomologist at Virginia Tech, will highlight 5 of her favorite bugs and explain why insects are important to the ecosystem.

Jan. 21: Blossoms

Did you know that it's possible to make delicious jelly from Kudzu Blossoms? We'll talk with the man who is Carolina Kudzu Crazy, Darryl Wilson.

Jan. 28: Birds

Dr. Steven Hopp, E&H professor of environmental studies, and world renown ornithology expert, will talk with us about birds and birding.

Feb. 4: Bats

Bats are fascinating...but oft-maligned. We'll be joined by a guest from the Virginia Department of Transportation who will talk about bat characteristics and how VDOT works to preserve their habitat.

Feb. 11: Barbershop

Warren (E&H '73) and Andy Fuson reveal and share the relatively unknown African American roots of Barbershop music.

Feb. 18: Beatles

Dr. David St. Clair (E&H '73), United Methodist Minister and E&H professor (retired) will discuss how the Beatles forever changed the face of music.

March: BC (It's a BONUS BEE!)

Jeremy Stout, geologist and nature educator at Steele Creek Park, will share the natural history of Saltville, Virginia. Watch the E&H Alumni page for details.
